discover more about their code and design visually in the browser. Use both traditional and code-based layouts (See New UI for navigation and selection of files from tab tree above.) to view and edit files. Organize content: Drag and drop files, folders, and sub-folders directly to code-based layouts.

Supports folders. Select multiple files to create folders in a single action. Navigate with keyboard shortcuts like any text file. Search for content in files using a syntax-aware search. Examine the difference between the edited and original file's text by comparing both in the bottom-right corner. Synchronize the files you are working on with the original or the edited file.

**Viewing HTML and CSS:** Preview and edit HTML and CSS right from the file's tab in the code-based preview. Use the preview to see what the user will see in the browser or view the code if you prefer.

Navigate the file to edit using the keyboard shortcuts like any text file. Design with browser testing tools: Preview HTML5 layouts from the code-based preview. Access all Chrome Inspector features to see and edit CSS, HTML5 canvas, and HTML
