AutoCAD has more features than any other CAD program. Some CAD programs, such as SOLIDWORKS, offer both BIM (Building Information Modeling) and technical drafting capabilities, but AutoCAD is unique in that it is BIM-ready (that is, it is fully integrated with BIM software). AutoCAD provides both 2D and 3D drafting tools.

The most widely used 2D drawing application is the drafting tool. Using the

drafting tool, one or more layers are set up to represent whatever is being drawn, and each of these layers has its own properties such as line width, style, color, and text. Many professional-level features are built into AutoCAD. Features such as the ability to create drop-down lists and a cross-referencing tool. AutoCAD also has built-in geometry editing tools such as line, arc, circle, elliptic, spline, and polygon tools. In addition, it has 2D and 3D rotation, translation, and scaling tools, as well as an external-image tool (that is, a 2D image that can be placed into a 3D model). AutoCAD allows for navigation via lines, rays, arcs, dimensions, and loops. AutoCAD also includes many powerful 2D features, such as snap to grid and snap to

object. In addition, AutoCAD has many features to assist in the creation of professional-level 2D drawings, including text and tables. AutoCAD includes a powerful 3D modeling tool. AutoCAD offers an integrated 3D modeling tool that works with a variety of file types, including DWG (AutoCAD), DGN (AutoCAD), DXF (AutoCAD), and STL (AutoCAD). Using this tool, users can model parts, assemble them, and then edit each part individually. Because the 3D model is stored as part of the 2D drawing, it can be manipulated in any dimension. AutoCAD also includes a digital lofting tool. The digital lofting tool can be used to create 2D and 3D surfaces (such as walls and doors), using AutoCAD's 3D model.

---

Users can then export the lofted object to other CAD packages, such as SOLIDWORKS. The digital lofting tool is an application feature and does not replace the 2D modeling tool. It is common for CAD applications to have a
