The drawing markup language XML (XML) (ISO/IEC 29500:2008) is used in AutoCAD. There are versions for vector, raster, web, and XML for use by AutoCAD. XML is used in various ways: to mark up drawing, to markup sheets, to exchange drawings with others via XML, to exchange views with other applications, and for generation of output files. Computers are connected to AutoCAD via wired or wireless networks, and via Bluetooth to mobile devices, such as smartphones. Users can also use AutoCAD over the Internet using web services and the Internet Explorer browser. There are many client-server programs and applications for interaction with the software. These include Autodesk Design Review (AutoCAD) to provide an interactive client for CAD and related design data review, over the Web. A number of software packages that are available for AutoCAD import and export, including other CAD packages, into and out of AutoCAD. These include: AutoCAD-based applications such as AutoCAD Architecture and AutoCAD Electrical CAD packages that use the DXF file format, such as SolidWorks and CATIA CAD packages that use other CAD file formats, such as MicroStation and DWG Pro/ENGINEER software, which can import and export CAD files into and out of AutoCAD Microsoft Windows-based CADDY software which can import and export CAD files into and out of AutoCAD Linux-based CAE/CADDY, a free software version of CADDY that can import and export CAD files into and out of AutoCAD Reader and interpreter libraries for reading and writing DXF files. An open source project, it is widely used as the format of choice for CAD interchange. It is supported by AutoCAD and many other programs. Many online communities provide enhanced support for AutoCAD users through online support resources. These include: Autodesk Exchange Apps The Autodesk Support Community Community Wiki Autodesk Knowledge Base Other resources include online solutions that allow users to learn about and find support for AutoCAD from a variety of resources. These include: Autodesk University Autodesk Knowledge Network Autodesk Answer Desk The Autodesk Developer Network The Autodesk Training Network Licensing and product pricing AutoCAD is licensed on a perpetual basis. Follow the instructions in the product as usual. I am getting an error : "Possible memory corruption or other severe errors have been encountered while the program was running. You can continue running the program by pressing Ctrl-C" I have no Idea why is this error coming. I checked if I have sufficient RAM memory available but I have 3GB RAM. Do I need to have a swap memory or something of that sort? A: Autodesk Autocad doesn't require more than 3 GB, but you may need to have enough swap space. Go to Control Panel -> System and Security -> System. Click on Change button and then click on the Advanced Tab. Set the "swap" value to 8 GB and press OK. If you get another error "You have low memory", then it's a bigger problem. Alternately, you can use Parallels and start Autodesk Autocad from there. Ask HN: Programmatic Content for my site - ZanyProgrammer Hi HN,I've spent the last three days trying to figure out how to create content and insert it to my site.The site is a smartypants content management site called NewsWars ( with the goal of publishing a lot of witty and smart content.I'd like to do this programmatically so that if I'm not around I can write some of the content and let the site run it.Any advice? ===== elad I think what you want is not a CMS, but just a web framework with a nice REST interface. Here's one: --- ZanyProgrammer Thanks for the link. That's exactly what I'm looking for. Q: How to find query string argument using jQuery I have an url like this www.xyz.com?id=abcd How can I access the id=abcd using jQuery? A: There are several ways to extract the query string: Use window.location.search, e.g. alert(window.location.search); // -> "?id=abcd" Or, with jQuery, you can use the built-in \$.param(): alert(\$.param(window.
