The present invention relates to a new and distinct cultivar of Iberis plant botanically known as *Iberis sempervirens* and hereinafter referred to by the cultivar name 'Fislandine'. The new cultivar originated in a controlled breeding program in Elburn, Ill. during May 2013. The objective of the breeding program was the development of *Iberis* cultivars with a compact growth habit and continuous flowering, dark green foliage and a late flowering date. The new *Iberis* cultivar is the result of cross-pollination. The female (seed) parent of the new cultivar is the proprietary *Iberis sempervirens* breeding selection coded 098F05-1-1-1-V-1-1, U.S. Plant Pat. No. 24,385, characterized by its medium green-colored foliage, dark green-colored foliage, semi-double flowered inflorescences and about mid-May flowering, vigor and growth habit. The male (pollen) parent of the new cultivar is the proprietary *Iberis sempervirens* breeding selection coded 098F05-1-1-2-1-V-1-1, U.S. Plant Pat. No. 24,385, characterized by its medium green-colored foliage, medium orange-colored inflorescences and about mid-June flowering, vigor and growth habit. The new cultivar was discovered and selected as a single flowering plant within the progeny of the above stated cross-pollination during June 2015 in a controlled environment in Elburn
