What's New in the?

Caps Lock Indicator is a lightweight and quite simple tray application that displays a pop-up notification informing the user about the state of the Caps Lock key on the keyboard. Have you ever tried reading on the screen while you are working on a keyboard? If you answered "yes" to that question, you must have realized that it is not the ideal solution. What is the best way to make sure that you are not distracting yourself from the task at hand? Of course, you can remove the keyboard and turn on the computer or use a separate monitor, but that might not always be the most convenient way of doing so. Some people might actually feel more comfortable with having a quick glance at the status of the Caps Lock key to make sure that it's turned on or off and the same goes

for the Num Lock and Scroll Lock keys. Caps Lock Indicator provides a quick and efficient way of staying on top of the status of those three most important keys on the keyboard. It is a light-weight and useful tray application for Windows 7, 8, 10 and Server 2008, 2012, 2016 and 2019.
