1931 is a visual novel and suspense simulation game. This game takes place in a parallel universe where World War II never occurred and books, papers, and a single library remain a thing of the past. It is a game about scheming, suspense, crime, and the danger of power. The game is for adult audiences only. HISTORY: 1930s London, England. Theo Brand, a young woman with a mysterious past, arrives at a mysterious mansion that serves as the home of the Garrington family. By the time she arrives, someone has already been murdered. She soon learns that the house is a library, where anyone may read or write, and that if their story is well-written, the house itself will grant their wishes. Since Theo's story is well-written, the Garrington family adopt her as their own. In the castle, tensions mount as everyone is caught up in their own stories. One of those stories is Theo's. "1931: Scheherazade at the Library of Pergamum features a well-told story, and a refreshingly free-flowing plot, which will reveal new aspects of the tale with each play through." 5/5 - Jay is Games "1931 is a visually stunning, well-written, deeply suspenseful, and involving piece of interactive fiction. Tell me that doesn't sound like a perfect fit for the reader of this site." 5/5 - ShadowWatcher "I, too, love the visual novel about a female protagonist. No, you don't need to understand this to enjoy the game." 5/5 - TheHorseLover "It's history, it's a lesson to be learned, it's an adventure, it's a thriller, 1930s London, a library for everyone, and a murderer still on the loose. The Garrington family, a hive of humanity, have their secrets—and their scandals—secrets that are well worth keeping." Reviews: "1931: Scheherazade at the Library of Pergamum is simply one of the best visual novels I have ever played." 4.5/5 - Jay is Games "1931 is the rare game that is truly suspenseful, is intelligent, and carries the weight of every choice you make with a compelling tale." 4.9/5 - BaerObain

The Game Bible by Coyston

The Game Bible is the first computer game powered entirely by a regenerative trance. Each player takes the role of a god. You start the game with a seed metaphorically planted by the wisewomem. You grow a tree and choose a deity to act as. That deity then plants the seed which you nurture for the rest of the game.
