AutoCAD is capable of creating 2D, 3D, and visualization (V) (also known as web or webz) output. AutoCAD has a variety of interoperability features with other Autodesk software, such as other AutoCAD programs, Inventor, Fusion360, and Revit. Many users also use third-party add-ons and plugins. Most add-ons and plugins are provided free of charge. In 2009, Autodesk rebranded its AutoCAD product line to Autodesk AutoCAD software. The two current versions of AutoCAD are the 21-year-old 2010 release, and the more recent 2017 release. The main differences between these two versions is the changes in the interface and in the application structure (for example, the 2018 release includes its own feature tools and drawing views). The 2010 release was intended as a major overhaul. The 2017 release is an incremental update, but it is optimized for a new set of hardware and to run faster. In November 2011, Autodesk announced AutoCAD 360, a cloud-based version of AutoCAD. It is available as a web-based viewer or as a desktop app. Autodesk announced a cloud-based, web-based Autodesk Navisworks 2018 on March 6, 2018. History AutoCAD was originally a modeling program for drafting purposes, and the code was originally part of AutoLISP. AutoCAD 1.0, released in 1987, introduced many of the first major features in the product, including the ribbon. AutoCAD's user interface was initially a standard Windows 2.x look and feel and contained a set of hotkeys commonly referred to as the "logical keyboard". Version 1.2 released in 1988 introduced some of the first graphical features, such as wireframes and auto-perspective. Version 1.5 introduced the AutoCAD graphics system. AutoCAD was originally a versioned product, which ran in a proprietary environment. In 1989, the system was ported to the MS-DOS operating system, with the graphic system being released separately as AutoCAD Graphics. Version 1.5.1 in 1990 added 3D capabilities, including various primitive shapes, freeform surfaces and solid modeling. Version 1.5.2 added support for drawing eDrawings and Powerpoint presentations, and added cut lines and exploded views. In 1991, the first source code version was released

The website shows that O'Rourke has a campaign staff of eight: his campaign manager, advisors, pollster, digital strategist, speechwriter, field director, deputy press secretary, and the campaign manager for his presidential campaign. The campaign also has several other staff members working on consulting, organizing, and fundraising. O'Rourke is among at least seven Democratic presidential candidates who have either jumped into the race or announced their intentions to do so. While the Texan has a chance at dethroning incumbent president Donald Trump, he could also be tagged as the young, left-wing candidate in the race. Despite being on the left, O'Rourke has not been without controversy. For instance, he resigned from the United States House of Representatives to spend more time with his family. However, before running for public office, O'Rourke was arrested for driving while intoxicated in 1998. O'Rourke was arrested after being pulled over in his vehicle at 12
