Apple patents secret patent for a geolocation-based ringtone company - satyajeet23 ===== satyajeet23 "Secretly" is a bit of an exaggeration, but a majority of popular ringtones today are connected to specific locations. For example, say you want to implement a round-up of up and coming movie releases or ringtones related to apple products. The company/device could help with this by recording your location and triggering the specific ringtone when it senses the location. Google has also been secretly recording user's location for some time now. There are many ad-related implications of this, but this is probably the easiest way to monetize location services. Stress-induced endocrine and metabolic adaptations: controversies and new avenues for the treatment of metabolic and cardiovascular diseases. The current review describes the effects of stress on the regulation of metabolic and cardiovascular function. Evidence for endocrine and metabolic adaptations triggered by stress is reviewed in terms of a sympathetic-mediated adrenomedullary secretory response, central activation of the hypothalamic-pituitary-adrenocortical (HPA) axis, activation of the renin-angiotensin-aldosterone system, increased generation of reactive oxygen species and release of stress hormones. These alterations have been implicated in the genesis of cardiovascular and metabolic diseases, which are the leading causes of morbidity and mortality in the Western world. Recent studies have revealed that a modified stress-response, whereby neuroendocrine activation is blunted but not completely eliminated, could help control metabolic and cardiovascular alterations. Evidence has also been presented for the clinical benefits of regular physical exercise and stress-reducing interventions. However, in order to benefit from the benefits of these two interventions, stress and the stress-induced endocrine and metabolic adaptations need to be better understood. There is a need for better methodological designs to address this question, and also the development of new diagnostic procedures to measure stress and its endocrine and metabolic effects. This article is part of a Special Issue entitled SI: Stress and Health. We also have a Holiday Lease Information and Agreement as shown below.
