The commands are located on the main menu bar, and a toolbar is available which is context sensitive. A preview of each command is displayed in the lower right corner of the screen. The main menu bar has various tabs that allow users to access the various functionality within AutoCAD. Line color Color can be specified for each line, and for the fill of a region (a rectangular area) or a selection of lines. These colors can be displayed and edited independently of the line style. Line width The width of a line can be specified either in relation to a length, or directly as a fraction. Line cap The cap of a line can be closed, half-closed or opened. A straight line has a "closed" cap. Line join The line join can be mitre, bevel, round, or a custom line join type. Line dash This property, along with the line width and thickness can be used to create a dot pattern for a line.
