Elden Ring is a fantasy game where you can create a character and play as that character in the land of Elden. Players can create their own unique character by choosing from a multitude of races, classes, and abilities. Players can freely develop their character to strengthen their abilities and learn epic skills to deal with challenges. Players can set out on their own adventure to explore a vast world that features multiple dungeons, item drops, and new dungeons to be discovered. Players will need to consider the influence of their own choices and the reactions of other players when meeting challenges. It is an action RPG that supports both solo and multiplayer play.

Q: How to pass a variable to unordered\_map's size() member function

```
Unordered_map * map = new Unordered_map(); map->insert(std::pair(s1, true)); map->insert(std::pair(s2, true)); map->insert(std::pair(s3, false)); std::cout << size();
```

The output I am expecting is 3

A: Use std::vector instead of std::unordered\_map. This will give you size() function for free.

```
std::vector<std::pair<string, bool>> vec; vec.push_back(std::make_pair(s1, true)); vec.push_back(std::make_pair(s2, true)); vec.push_back(std::make_pair(s3, false)); std::cout << vec.size();
```

instead. Then you can use the.size() method. See more information about vectors here.

## **What's new in Elden Ring:**

**CYCLE OF CUTTING EDGE** Until now, there has not been a game in which you can live as a swordswoman and a mage. In the sequel to the smash-hit fantasy action role-playing game, **TORN**, you take on the role of a woman with light blue hair, descend the slope of the Royal Palace, and meet Aenea, Mana's sister. Aenea will help you return to your mother's side - your ancestral home where a conspiracy of the nobles is unfolding. Bear witness to the destruction that the house of the crafty sword wielder, Xuan Liu, has caused. While saying nothing, Xuan and his followers mercilessly cut down innocent people. On the top of the slope, you engage in battle, and finally reach Sina's path that leads to a landfree of magic. As a magic caster, you must wield a "Fireball Magic" to oppose Xuan and end his plans, while also involving yourself with an ordinary soldier and a kind-hearted older woman. Your decisions will change the fate of the entire country. This is an online RPG where you continuously play with others. As you clear side quests, talk with other players, and participate in various events, you will forge friendships and savor the dramatic actions of other people.

**TORN**--a game that captivates every kind of gamer. Even if you have never set foot in a virtual world, you can easily get along with the person next to you just by looking as you choose from among three beautiful voices. And since **TORN** is a soft game, you can enjoy the game with your children or other family members, so it is an ideal family game.

**They can create a colorful character with various features and freely combine armors, clothes, and accessories. If they want, players can even switch the appearance of their character during the game. Players can quest with their companions as they progress. They may be assisting the village's samurai with fishing or fighting off bandits. Or they may be accepted as members of the castle's retinue and play as a knight. Players can even meet major characters from TORN in the home of a local farmer**

Finish the game. so I bought the game a few days ago and played it for a few hours before the save-scumming bug halted the game forever (with less than 100 Nydralani). A few months later, I decided to put some effort into improving the way the game plays, so I made a new save and imported it. The game is great, to be fair, but I'm wondering how much of the game is actually salvageable. Things I've noticed as I played: 1. Almost every NPC is supposedly a member of the Elden Ring, but there's no indication that's true at all. I find myself walking around with my hand held out at the height of an Elden lord's soul, whilst wondering whether I've been sent to a band of chumps. 2. The racial and class system is a bit of a mess, even by Mass Effect's standards. Specializations in all classes are all straight-up L1/L2: ranged attacks, melee attacks, durability, etc. There are absolutely no specializations above that, and classes with specializations can't be changed. This makes a lot of things incredibly boring, like tanking. 3. The game is evidently structured so that you get to the boss fights and then die. Which, if you're going to do that, why not just do that in the first five minutes instead of wasting seven hours grinding, unlike the first game where you could survive past the first boss fight indefinitely if you just played normal? 4. The story is fairly superficial, bordering on poorly written. It also features some particularly annoying bits, like pointlessly using exposition and description to explain things that were just on screen one minute ago. 5. The enemies are not just the same, but are literally the same, with no variation at all. I could literally set the game to auto-attack for all difficulty levels and it would still be a grindfest because they're all
