**I tried the beta some time back but it seems like I didn't manage to beat the first dungeon. In this review I'll discuss the problems that I encountered and some of the good things that were in the game. The following preface is a list of impressions of the game, but it can be read a bit differently depending on how you view it. ○ Story : I'm more interested in this game when I think about the game as an "RPG game" rather than a game about crafting. The game's story revolves around the main hero. The gameplay is pretty difficult as the enemies are very strong and you die often. This makes it tricky to follow the story, and I started to believe that a lot of**

the parts in the story, which are included in the script, are useless. That said, the story is still good. When you die, the game lets you "resume" in the current dungeon. Once you complete the dungeon, you resume at the beginning. When you get to the final dungeon, you can talk to the girl, who is the main hero, and you can listen to her story. If you are interested in the story, you should definitely talk to her to know all about the story. I did not pay attention to the story, so I am not sure if there is actually something interesting behind it. ○ **Difficulty** : The main difficulty of the game is dying, and the game does not hold your hand at all. If you die, you will see the world from the viewpoint of the camera before you reappear. When you see that you are in a certain spot, you can die there and come back again. The game will not die, so you only have to get back to the beginning of the dungeon. If you die, you will have to do the entire dungeon over. The map will remain if you do not have your previous save point. The game will not let you go back to the beginning of the dungeon and keep on going unless you have enough life points. So, the game is very difficult. Even if you complete the first dungeon, you will probably die later. This means that the game's difficulty is not gradual, but continues to be harder and harder. ○ **Graphics** : I have low expectations. The characters look just like usual JRPG characters. However, the music and scenery are really nice. The game world is filled with a sense of size and depth, and it gives off the feeling of bff6bb2d33

The villages that are engulfed by the darkness have fallen into ruins. In contrast, the capital, which is the true heart of the entire village, is full of life. Elden Lords who have founded the capital have overcome natural disasters and calamities and have strived to build a prosperous and beautiful world. On one of the streets in the capital, the Scepter of the Elden Rings is displayed. This Scepter is a wonder of the ancient world which has been kept protected by the Elden Lords and the inhabitants of the capital. Using this Scepter, an Elden Lord can command the blessing of the Guardian of the Elden Ring, which is a divine being that exists within the land of Fravel, and raises the land from the dead. Using this, an Elden Lord can accept the great responsibility of leading the capital of the empty villages. And in order to become an Elden Lord, you will have to advance to a high rank using the Scepter.
