“Our goal with the FIFA World Player Series is to deliver the most immersive and authentic FIFA simulation ever and help take the experience of becoming a professional footballer beyond the page,” said David Rutter, Senior Director, FIFA World Player Series, Electronic Arts Inc. “We use real-life player data to create gameplay that feels more like players are actually playing the game. The way players move and respond to the game gives a true sense of speed, fitness and skills.” The physics engine supports more realistic movement, interactions, collisions, goalkeepers, marking and off-ball actions. The player intelligence system creates a more intuitive and intuitive experience with the first pass, dribble, shooting and header controls of real players. The running and reactions feel more like a real football match. The engine includes a more responsive AI with improvements in tacking, short and long passes, and easier slide tackles. Players’ skills and confidence will also improve over time. The new engine also includes new ball physics and intelligence, which take advantage of new FIFA’s new player-owned player concept. The ball now reacts to the behavior of the players in a more dynamic way. Players now create opportunities as they receive the ball, and assist and create goals just like in real football. It also helps create more realistic, goal-scoring situations. The new engine increases the realism and depth of the new 3D camera angle and provides new views from multiple camera angles, both in front and behind the player. The new 3D

camera viewpoint is also more realistic with a new moveable head, new camera's pupil and focus. The new engine also includes improvements to the ball physics, dribbling, and player intelligence. It allows the ball to travel in more realistic ways. Players get used to the new ball and can adapt to it as the game progresses. Dribbling also feels more realistic and intuitive. Defenders are more aware of the player's space and more opportunistic. The engine includes improvements for the new Player-owned Player concept and player-to-player communication. Players now communicate with each other during the game and can form a team like in a real match. They can also use teamwork to make progress. Players can build confidence levels with their teammates and improve their skills. The new engine will also help bring more fidelity to the pitch, including larger goal areas, more crowd support and better transitions from gameplay to the

FIFA™ is one of the most popular association football (known as soccer) games on the market. Earn laurels for your country in any of the 24 national teams available: Brazil, Argentina, Germany, England, Spain, Japan, Italy or France. The game makes players a part of the action, whether you're playing as the world's best strikers, boundary breakers, creative masterminds, ball chasers or defenders. Once you're playing you can change tactics on the fly, test your skills in training sessions, or hold your very own FIFA Leagues, where you and your friends will battle it out online. More detailed features of the game are available by selecting the Technical Info option. Features:

- Virtual Pro - Be a part of the ultimate football experience by becoming a Virtual Pro. Players can use the real Virtual Pro teams and their players when playing the game.
- New Speed Game Mechanics - The new game engine allows for increased speed and timing across every aspect of the game.
- More Tactical Options - Add to the fluidity of how football should be played by allowing players to set-up through the back and switch formations at the drop of a hat.
- More Control of Players - Now users can control players in ways that were not available in previous iterations of the game.
- New Character Creation Engine - Customise your team completely by creating your own stars.
- FIFA Champions League - Fight for glory in the new FIFA Champions League.
- Dynamically Updated Seasons - Experience new features and fresh content as you play the game.
- Dynamic Player Performance - Make players run even faster, change their speeds at any time and adjust to the pace of the match.
- Real World Player Trajectory - Players will bend in ways never before seen and change direction in real time.
- The Team of the Future - New faces; new stories; renewed sense of

ambition. Optimised for Xbox One - Xbox One X Enhanced - The game has been optimised to play on the most powerful Xbox One X. Xbox Play Anywhere - Play and progress saves on both the Xbox One and Xbox One X consoles. Gameplay: The game engine is built on the philosophy that football should be played the same way it's played in real life. It's more about flow, timing and the ebb and flow of a match than digging into an in-depth tactical manual.
