If you like the world you created and would like to add more details to it, then you can do so through the button that appears in the top-right corner of your world. Paste the story Finally, JavaScript Crocodile lets you paste the story you created into an article and share it with your friends. Paste the story You can also edit the story, if you'd like to make changes to it. Fairy tale characters It's easy to add special characters to your story.
