Simply POS (formerly Simply Touch) Crack Free Download 2022

Simply POS is a simple to use POS (point of sale) system that provides you with the means to manage your restaurant, cafe or pizza shop. Simple POS gives you the tools you need to successfully manage your restaurant, from stock control to reporting to staff management. This is an online version (internet) of a Palm OS program called Simple POS. Simply POS uses either the web or a browser-based interface to manage cash register transactions and your store information. The web version is simple and easy to use, allowing you to view and manage your store through an interactive web page. Simply POS is a simple program that provides a means for cash register transactions to be linked to the inventory system. Simply POS allows you to send text to phones, e-mail, fax and modem, and to send passwords (PIN numbers). The program tracks every item a customer buys, including sales tax. You can then analyze reports of your customers' purchases to help you improve sales. Simply POS can also be used in retail stores. It takes care of stock control, reporting, refunds, laybys, stock re-ordering, barcoding and inventory history. It can also be installed in multiple-stores, all inter-connected and running the same data (or separate database) - Real Time, LIVE over the Internet. Simply POS (formerly Simply Touch) Features: Control your staff and cash register by entering employee times, shifts and absences. Designed to handle the most common restaurant transactions such as: Purchase/Sign-in. Check-out. Pay by CC and debit/credit. I've used this POS to great effect on a chain of cafes, and it's worked out great. Free trial is all you need, and the word is that their customer support is very good. Comments Review by matthieu v on Friday, November 23, 2012 Very easy to use, it took me about 10 minutes to get everything working smoothly. b7e8fdf5c8

Simply POS is a simple to use point of sale system that provides you with the means to manage your restaurant, cafe or pizza shop. It gives you the tools you need to successfully manage your restaurant, from stock control to reporting to staff management. Simply POS can also be used in retail stores. It takes care of stock control, reporting, refunds, laybys, stock re-ordering, barcoding and inventory history. It can also be installed in multiple-stores, all inter-connected and running the same data (or separate database) - Real Time, LIVE over the Internet. Simply POS is available in two versions: Simple Touch, and Simply POS Simply Touch: Simply Touch is designed to make running your restaurant as easy as possible. It gives you a simple, easy to use software based on built-in computer systems. It enables you to manage POS system through a real time online interface, directly on your Internet browser. Every function is accessed from your computer instead of using a hand held system. Simply Touch is designed for small restaurants (kitchen only) and starts at under \$2,000. Simply Touch provides a detailed monthly invoice showing exactly what is being sold. You can also print reports and re-order stock. Simply Touch has a modular design, allowing you to expand the system to meet any type of requirements. Simply Touch is the ideal solution for those wanting to launch their own cafe, restaurant or pizza shop. Simply Touch has no need for a server. You simply scan the barcode to process your customer order and it will be placed on your printed receipt. Please note that it can be very tricky to get free and unlimited internet access in the USA and Australia if you are a business owner, not so much for individuals. Real time tracking, live over the Internet of all food and drink sold, entered into the system and most importantly not required to be lost or mislaid. We believe that this is the Holy Grail for the restaurant and cafe industry. It is simply not to late to get this right. Simply Touch can be enhanced to enable you to provide a self service. We understand that some consumers are not comfortable with hands being placed in their food or drink or that they just prefer a self service approach. Simply Touch is configured and delivered with a user friendly programming interface that is very easy to use. Simply Touch is a terminal based POS and does not have bar coding capabilities. Simply Touch has no need to be internet enabled,

What's New in the Simply POS (formerly Simply Touch)?
