The Domini-Valkan War. Think of it as Warhammer 40,000. When Lomar was on a raft floating out to die in space, the earth was at war. Lomar saw the planet with new eyes. No longer did he view Teiresia as a beautiful world. Rather he saw it as the cradle of civilization. A place where so much life was pulled out and molded for a desperate fight. Where the planets people watched in horror as the sky became filled with fear, the only place where their lives were imbued with meaning. A place where every life mattered. A place where the war was born out of the desperation to survive. Earth's skies were black with battle as the leaders of the warring nations got down to business. Planet sized bombs fell upon the cities of the planet. Nothing could keep

humanity back. The war continued for two years. The world waited. The world's leaders waited. The earth waited. And the stars, waiting for their chance. The tide turned. The race to the moon to send the first message back to earth was on. The moment had arrived, the moment when the earth and the universe would meet. The countdown to when the earth would be engaged in a live battle with space, all to see who would be the last. And it was decided. There was a chosen one. That one would change the fate of the worlds. That one would strike from the heavens. And they returned with a bang. The point of no return, the point of planet-wide destruction. The skies were filled with fire. The nukes and missiles and ships all turning the night into day as the earth shook to the tremble of the cosmos. The moon became covered in a veil of fire as the chaos was unleashed from orbit and ravaged the world below. With what was left of the moon in a distant orbit, the battle went on. The earth was shaken from the moon by a massive shock wave. The world was thrown back into the dark ages. The

The Domini-Valkan conflict began when the reformation of a once fractured nation was called for. As people of peace, they decided to become one nation once more. A glorious step towards evolution and unity. Many, however, did not agree, and they did not stand idly by. Their animosities festering from within for hundreds of years. Calling for a new way of life and calling for unity. A new nation brought on with the promise of a glorious new beginning. Thus the Domini-Valkan War began. The struggling kingdom of Valkana needed a hero, an idol. One they could worship. One to unite them in the heat of the conflict. To be the one that would lay the foundation for a new future. In the face of such struggle, the Hero of unity and Evolution, Yomi Domini, was born. Diesel is often mistaken for Afghan Kush (also known as Afghan) even though the two strains are completely different. It was created by the Dutch "De Amsterdamse Grasiere" who had two female marijuana strains crossed with Mr. Green's Permafrost and Dr. Dank's Northern Lights. Sour Diesel was once an obscure dank weed sold in shady areas in the United States, but has become more popular over the years. Sour Diesel is a good strain for relaxation because it is sativa dominant and makes you feel happy and full of energy. Sour Diesel offers a relaxing head rush that makes you feel alert and happier at the same time. Sour Diesel can make you feel like a raging party animal but will not make you want to do crazy things. Q: Connection closes when calling createUniqueConnection on multiple clients I have a program that attempts to send a text string to multiple devices on the same wifi network, but only one of them works. All of the devices get identical output, the one that is working. I debugged the problem, and found that the first line of the creation of each socket does not work properly, and the connection closes early and not waiting for the other clients on the wifi network to connect. Here is my code: My problem is that I don't know how to properly set up the address so

that all clients are able to connect to the server. I thought that maybe the Server is trying to send the message to itself, so I tried creating a unique connection each time the main function is called, but it didn't work. As you can see, I am trying to have the client connection only once, but instead it is connected and shared across the client. A: Answering my own question: I believe the problem was due to uninitialized memory.

of Constantinople Yomi Domini (abbreviation: Domini) of Constantinople was an apostolic and didactic bishop, theologian and writer. He is best known as the author of a treatise entitled Confutatio Legum Disputationum (published in 1843 and commonly referred to as The Confutatio). There are also a few references to him in the Acts of the Sixth Synod of Constantinople. His writings include mainly on the traditional Christian beliefs. Life Yomi Domini was born in Constantinople on 6 September 1807, and died in that city at the age of 69, on 20 October 1859. He was of Cappadocian origin. He was a lawyer by profession and, according to Michael Philaretos, his wife also served as an educator. Yomi Domini married a second time to the widow Elisabeth of Zagora (Elissa) that took vows as a deaconess and cared for the poor. She raised Yomi Domini's children. It is also believed that Yomi Domini was influenced by the writings of Saint John Chrysostom. Yomi Domini served the Constantinople Emperor as a lawyer. Not much of his life is known. Apparently, Yomi Domini was fluent in Latin, Greek, and Arabic (Oriental languages). He was a priest of the Christian Orthodox Church and a theologian by profession. It is supposed that he was an ascetic believer in asceticism and a follower of the monasticism. It is further assumed that he was an economist and an editor of the manuscripts, as he was elected sub-editor of the Scriptorum Ordinis Monachorum Byzantine Ordo Iuris (Record of the Order of Monks The Greek Orthodox Patriarchate) at the age of forty-three. The defenders of the Orthodox faith viewed his writings as occupying a position between the spiritual and the secular. Vocations are provided by several sources: The Confutatio appeared in 1843. Being composed of five chapters, it contained a criticism of the "legismos" school. This work is supposed to be the polemic of the author against the lawyers, which ensued at the time of the "Sickness of Leo". The work is a bulwark of the Orthodox dogma. Michael Philaretos in his book about the "Tradition of the Fathers, Apostolic Fathers and Orthodox Fathers" published in Greece, according to the recent research made after
