Improved Animation – The enhanced animation system, powered by Havok, enables more realistic and nuanced animations for players and enables the animation engine to more effectively capture the technicalities of the game. Improved Player Movement – Adaptive Motion Capture allows the movement of individual players to be more accurately simulated. Players can now sprint and accelerate faster, and decelerate more quickly, therefore better representing player speed and decision making. This introduces a more dynamic, challenging and enjoyable gameplay experience. Realistic Ball Physics – The ball physics engine has been tuned to deliver a more accurate touch in the player’s hand to ball contact, adapting to off-balanced players and reduced on-pitch field space. Player Trajectory – New dynamics in ball trajectories increase the variety and unpredictability of player movements, creating a more realistic football experience. Reversible Movement – The amount of space in which players move around the pitch can be altered in real time, introducing more tactical options in movement that will allow players to move across the pitch with greater freedom. Defence Tuning – Players will be able to alter their defensive awareness or aggressive behavior in the heat of the moment using defensive technology. FIFA Player Switches – Gameplay has been improved to make it easier to play in a more open, free flowing style, with new player switches allowing players to be shifted around the pitch more fluently. Improved Goalkeepers – Goalkeepers are now smarter and more agile when making their run to try to stop shots. They can also more accurately predict where goals will be scored from, as well as more fluidly anticipate an attack. The gameplay system has also been improved for FUT Champions, introducing new match styles and new gameplay mechanics. Real-time strategy (RTS) gameplay has been improved, with more realistic animations, new mechanics for managing units and new units, as well as quick-fire team fights. A new adaptive fatigue system has been introduced. Gameplay on the pitch can be influenced by injury, game rules (a round robin tournament or a league), fan chants, player effects, and more. New psychological support includes enhanced animations that players' make during games and in situations that they need help. The new Skill Tree feature allows players to personalize their attributes, making these characters more accurate and agile in their moves. New Goal Control options let players make use

FIFA is a video game series created by EA Canada. Released on the Amiga in 1985, FIFA landed on the arcades and consoles just two years later. After 16 sequels, the game made its way to the PlayStation 2 in 2002 and Microsoft Xbox in 2005. FIFA was the best-selling football game for 12 years. FIFA games are available in 43 countries and 35 languages, with over 200 official licenses. The World Series mode brings back a concept that worked extremely well in FIFA 15. During the course of a single game, you can build your squad, pick your formation, and use the entire experience to create the most memorable match possible. FIFA 22 will introduce the Community Draft. Here players from around the world can show off their talents by creating a custom team and inviting other players to join. The Community Draft will remain available throughout the year, with multiple different drafts taking place simultaneously. Features Check out the video below for a breakdown of all the features you will get with FIFA 22. "You see that Top/Left corner where the crossbar crosses the same line as the opposite corner. They've decided to do away with that rule and make it more of a free-kick/ball-in play situation. I imagine it gives a lot of players who like to score from set plays cause it's one of the most consistent ways to open up scoring." FIFA will now feature the ability to switch formations mid-match. Like in real life, coaches always try to modify their line-up and formations to maximize their game strategy. Now the smart FIFA fans will always be one step ahead of the opposition. "With the ability to switch formations mid-match, you can try out one formation, make a few changes and then keep the formation switched until the end. You can also substitute players on the field and then immediately swap to a different formation." "If you're like me, you like to have a more natural looking looking ball, because you feel like that's how the ball gets in the back of the net. The physics will be reworked, so you'll feel that more impact and that natural look. The ball will no longer fly off of the foot and just kind of roll." All of the modes in FIFA 21 have been revamped and improved, including the new single player Career Mode which is now played from four game years forward. "We've tried bc9d6d6daa
