If you want to know more about Photoshop Elements visit our review Adobe Photoshop Pro and Photoshop Elements are very powerful and full featured photo editing and graphic design programs. They do offer more professional tools and features.

Adobe Photoshop elements that you are talking about is the less serious version. Among many users, they use Photoshop Basic as their main camera or photo editing and graphic design software. Adobe Photoshop basics is a very basic and easy to use image editing and graphic design software but not the most powerful. What does the word "Pro" mean? If you are on the

computer for a long time, you will see the number of times you have logged in and logged off. These numbers indicate how many times you have activated Adobe Photoshop. If you have a limited amount of computer time, you may not want to activate more than once an hour or once a day. This is not an instant crash program, however. It is a program that saves your work when you press the "S" key or when you close the program. Also, this version does not allow you to enlarge images from any website.

If you want to enlarge a photo, your only option is to buy a dedicated image enlarger. You cannot print images in this version either. This is a printer for photographers. However, the controls are limited and it does not have as many features as Photoshop Elements. Adobe Photoshop Pro is a serious and powerful version of the program. It allows you to scan digital photographs into the program. You can crop and resize, adjust exposure, brightness, and shadows. You can also adjust the colors, lighting,

sharpness, contrast, color saturation, and hue. You can remove noise from scanned photographs. You can use your own resources to make your own filters and coloring tools. The pro version does not have an in-program autofocus feature. You

can print your work, and you can create and save custom templates to other media, such as CD/DVD or flash drives. This is a serious and powerful image editing and graphic design software. It can help you create professional-quality photographs, illustrations, and graphics. If you want to learn more about Photoshop Pro visit our review Although Photoshop has an open architecture, they maintain a monopoly on the image processing and vector graphics industry. Adobe Photoshop Elements is part of the Adobe Photoshop Family Program. This 05a79cecff

A coalition of seven of the nation's largest credit reporting agencies (CRAs) have come out in support of the FCC's proposed Title II rule that would require broadband companies to treat all web traffic equally, regardless of whether it's data or voice. The new rule "is not the end all and be all. However it will go a long way in leveling the playing field to encourage broadband deployment in rural America," according to TechNet's group director of information technology policy, Christian Dulac. He said the rule is especially important in light of recent allegations that AT&T has been throttling web traffic, and other aspects of the proposed rules could have a significant impact. "Regardless of whether it's data or voice, the very idea that we have different rules for different traffic is antithetical to competition," Dulac said. "I think the problem in the back and forth between the broadband providers and the CRAs has been that the CRAs had not yet been moving to compliance with this regulation." Open internet rules for wired and wireless networks have been a hot-button issue for years now, with lawmakers and consumer groups on both sides of the aisle calling for heavy regulatory and enforcement efforts on broadband providers for poor customer experience. AT&T announced late last month that it would impose a reduction of three lines of downstream bandwidth during peak hours. On Tuesday, the National Cable and Telecommunications Association argued that the FCC's proposed rules will drive up costs for consumers and "destroy" net neutrality, despite the large number of companies that support the rules. Verizon and Comcast have come out strongly in favor of the new open internet rules. "The public is increasingly recognizing that net neutrality rules are necessary," Dulac said, adding that the unanimous release of the coalition's statement indicates that CRAs are finally beginning to catch up with the rest of the country on the issue. "As a result it's very clear that the CRAs believe strongly that the rules need to be put in place." Still, some in the industry have remained skeptical that the new rules will have much of a significant impact on broadband customers. "While I believe the proposed rules would mean certain levels of service for customers regardless of whether they are a business or consumer, I do not believe they will prevent or change a negative relationship many consumers have with their broadband provider," Open Internet Coalition (OIC) Executive Director Erika Feller said in a statement. "The vast majority of consumers have not shared my belief

Prevalence and characteristics of undiagnosed hypertension in a primary health care facility in Johannesburg, South Africa. In this cross-sectional study, data from 390 hypertensive patients from a large primary care facility in Johannesburg, South Africa were collected to determine the prevalence of untreated and uncontrolled hypertension. Mean age was 61 years. 65.1% of patients were overweight, 25% obese. Blood pressure was recorded and its level was classified as normal (systolic or = 140 and diastolic or = 160 and diastolic > or = 100 mmHg). Mean systolic blood pressure (132.5 +/- 23.9 mmHg) was significantly higher than mean diastolic blood pressure (84.2 +/- 15.9 mmHg). 42% of patients had controlled and 58% had uncontrolled hypertension. Only 7.1% of patients had normal blood pressure. Older age, female sex and being overweight were found to be significant predictors of uncontrolled hypertension in the univariate analysis. In the multivariate model, age, gender and BMI were the most important predictors of uncontrolled hypertension. 62.8% of patients diagnosed with hypertension had controlled blood pressure and therefore could have avoided a severe complication of hypertension. The results of this study suggest that a high proportion of patients with hypertension are untreated and undertreated.

1. Field of the Invention This invention relates to power steering for a vehicle. 2. Description of the Prior Art In power steering arrangements, such as the HSN steering system illustrated in the schematic view of FIG. 1, torque applied by the steering wheel to the steering shaft is converted to assist force by a servo unit 1, and the assist force in turn is applied to the steerable wheels by a power supply unit 2. The power supply unit 2 includes a yoke 11 which is pivotally mounted on a bracket 4 which is secured to the vehicle frame 3. A pair of small diameter ball bearings 12 are disposed between the yoke 11 and the bracket 4, and a larger diameter ball bearing 13 is disposed between the yoke 11 and a spindle 14 which is secured to the bracket 4. The ball bearings 12, 13 and a thrust bearing 15 are commonly rotatably supported by a housing 16 which is fixed to the yoke 11. A rotary shaft 17
