**\*\*Arrange and resize  
the artboard to the  
size and proportions  
you desire, or pick  
the icon in the upper-  
left corner and then  
drag it in.\*\*** ##

Using the Layers  
panel Photoshop can  
create a clean and

---

modern look to your images. The workflow to do this is actually very easy. But it requires a little set-up. That is, first you need to know how to create, arrange, arrange, arrange, and arrange the layers. 1.

**\*\*Make sure Photoshop is running in the Layers panel mode, as shown in\*\***

---

**\*\*Figure\*\***

**\*\*13-6\*\* \*\*.\*\*** If you are using Windows, you need to click the Layers panel icon in the upper-left corner of the Layers panel window (shown in the margin of Figure 13-6) and then select it for that view. You can also choose the Edit Layers mode in the File menu. If

---

you're on a Mac, just click the Layers button in the upper-left corner of the image area. In Windows, it's labeled with a painting brush icon. On a Mac, the icon looks like the wrench icon (shown in the margin). 2.

**\*\*Click the New Layer icon at the bottom of the Layers panel to create a new**

---

layer (\*\*

\*\*\*\*\*Figure\*\*

\*\*13-6\*\* \*\*).

\*\* On a Mac, just drag down to add a new layer to your image.

On a PC, choose Layer | New Layer.

A new layer appears in the Layers panel.

3. \*\*Type\*\* Mobile \*\*in the name

field.\*\* If you want, you can customize the layer by clicking

---

the little padlock on the right side of the name field and then typing the new name, as shown in Figure 13-7, or you can move the layer using the Move tool. Right-click (Windows) or Control-click (Mac) the name you typed to select it. To move a layer, hold down the Shift key and drag the layer to

---

where you want it.  
When you let go,  
Photoshop creates a  
separate layer  
beneath it with that  
name. \ (You can do  
the same thing with  
Layers panel  
icons.\)"), next.

Q: Manage files/folder sharing between users of the same machine When using windows, whenever I open a file and use its properties to Share the file, this opens it for everyone. I want it to open for everyone, but still only for me. Possible

---

to perform this with files/folders and as a service (php-program) A: You can control who can access the files and folders on your computer using AD domain. You can easily share the directories or files using MMC. Here's the steps: Run the following command in the command

---

prompt window as  
administrator: netsh  
advfirewall firewall  
add portopening  
TCP 139 listener 80  
Open Windows  
Firewall with  
Advanced Security  
Click on the Inbound  
Rules tab Click on  
New Rule Select  
basic filtering rules  
under "Action"  
Select 'allow this  
program through

Windows Firewall  
with Advanced  
Security" under  
"Protocol" Open the  
'Assign an allowed  
group or user' list  
box, search for the  
group (or user) you  
want to allow to  
share the files. Click  
on the list box, check  
the 'Allow the  
connection' option.

option The same work for the Share a folder option. The present invention relates generally to an antenna assembly, and more particularly to an antenna assembly for a communication device, such as a cellular telephone. One of the most difficult and common tasks

---

associated with any  
wireless  
communication  
device is optimizing  
antenna  
performance.

Depending on the  
situation, an antenna  
can provide one of  
the worst receiving  
conditions on a  
portable  
communication  
device, where the  
communication

---

device is moving or is located in a moving vehicle. In these situations, a great deal of time and resources is spent on optimizing the antenna performance. This is especially true for cellular communications, where a cell phone using these technologies is

---

typically moving and its associated antenna is trying to maintain optimal connection conditions. Prior art antennas are shown in FIGS. 1A, 1B, 1C and 1D. FIG. 1A shows a prior art antenna 10. As shown, the antenna 10 includes an antenna element 11 and a supporting

---

element 12. The antenna element 11 is a loop or dipole element. The supporting element 12 includes an electrically conductive element that extends from the electrically conductive body 20 to the antenna element 11 and provides support. The antenna element

---

11 is electrically  
connected to a  
ground plane 20,  
shown in FIG. 1B

U.S. Testing To Cut  
Back Oil Shipments  
The Obama  
administration is  
preparing to review  
oil imports from  
Canada and allies  
with a goal of

---

slashing U.S.  
dependence on  
foreign oil, the New  
York Times reports.  
The plan, outlined in  
a document sent to  
Congress last month,  
is part of a strategy  
intended to cut U.S.  
dependence on  
foreign oil. The  
Times says U.S.  
officials have begun  
reviewing shipments  
from countries that

---

are major oil exporters to Canada and the Netherlands. The plan was developed over the last several weeks, the Times says. The White House is expected to make a decision on which nations to target before the end of the year. The draft memorandum, obtained by The

---

Times, says the review will involve testing ways to limit the amount of petroleum being imported into the United States. On Oct. 4, President Obama announced that he wants to cut the United States' overall oil import dependence by up to 20% by 2020. The strategy was outlined

---

in a memo sent to members of the President's Council of Advisors on Science and Technology in June. The strategy was outlined in a memo sent to members of the President's Council of Advisors on Science and Technology in June. The memo, which also targets

---

renewable energy, praised a study that states that electric utilities could save more than \$140 billion by using different power sources to meet their needs. The strategy was outlined in a memo sent to members of the President's Council of Advisors on Science and

---

Technology in June.  
The memo, which  
also targets  
renewable energy,  
praised a study that  
states that electric  
utilities could save  
more than \$140  
billion by using  
different power  
sources to meet their  
needs. For example,  
a large nuclear plant  
near a coastal city, or  
a massive system of

---

wind turbines spread across a large area. The idea is to reduce the nation's dependence on imported oil and coal and create jobs in energy industries. But critics say that despite its laudable goals, the plan is unrealistic. “The document makes no mention of the most effective — and

---

most immediate —  
way to reduce oil  
imports: blocking oil  
from leaving the  
country,” Robert  
Rapier, a senior  
fellow at the  
Competitive  
Enterprise Institute,  
said at the time.

“The document  
illustrates a profound  
misunderstanding of  
how oil markets  
work and the

---

government's  
legitimate role in  
ensuring that we  
have a reliable  
energy supply.”
