About AutoCAD AutoCAD is a commercial CAD software application originally intended for the creation of architectural and mechanical drawings, based on the system's user interface and the editing features, as well as its many features, such as spatial and linear dimensions, and the ability to generate documentation. It is used by design firms, mechanical and construction companies, and architects to create 2D and 3D models, drawings, and project files for a variety of architectural and engineering purposes. Today it is used by millions of professionals worldwide, including over 95 percent of the world's largest design and construction firms. AutoCAD started out as the AutoCAD Architecture (AutoARC) application for the Apple II and the IBM PC. In 1989, Autodesk released a version for the Apple Macintosh and in 1993, a version was released for the DOS/Windows platform. In 1997, the DOS/Windows-based version was upgraded to AutoCAD 2000, which included many new features, such as the ability to open and save files in a specific location, rotate objects, and generate documentation. It was also the first AutoCAD application to support the Windows 3.x platform. AutoCAD 200x, released in October 2002, was the first version to feature 2D drafting, 2D modeling, and design review capabilities. It also included the ability to import and export DXF files, which would become the native file format for the AutoCAD application from that point onward. The 2002 release added orthographic projection support, AutoCAD Dynamic Input, and support for dimension styles. AutoCAD 200x also introduced a new user interface based on Windows XP, as well as the ability to run on platforms other than Windows. The Windows-based version of AutoCAD 200x was upgraded to AutoCAD 2008 in August 2005, which added many new features such as the ability to import and export DWG and DXF files, different waypoints, the ability to specify coordinate sets in non-integral units, and the ability to use Project Professional as a dialog or batch input/output (I/O) source. AutoCAD 2008 also introduced the ability to create and manipulate blocks in a drawing, the ability to change the layer assignments of elements in a drawing, AutoCAD Dynamic Input (ADI), and a revised user interface that was based on Windows Vista. AutoCAD 2010 was released in May 2009, and included the ability to create your own keyboard shortcuts, and an improved user interface

Autodesk's Objet 3D CAD/CAM (ObjectARX) is a type of Autodesk Application Framework (AF) that provides a suite of modules to build and run plug-ins. These modules are basically a set of classes that make object interactions easy to develop. ObjectARX consists of plugins that can be categorized in four types: 3D Modeler: generates 3D models from 2D drawings. Model Viewer: renders 3D models on a 2D drawing canvas. Viewer: displays 3D models. Writer: exports 2D drawings as 3D models Autodesk Architecture Edition Autodesk Architecture Edition (AE) provides the Autodesk Building Information Modeling (BIM) technology, and includes design tools for the creation of intelligent building and planning information for computer-aided design and the construction industry. As of 2019, Autodesk Architecture Edition is a discontinued product, and the new Autodesk Building Design Suite was launched. Autodesk Building Design Suite The Autodesk Building Design Suite (BSD) is a collection of applications related to the Autodesk Building Design Suite (BIM). BSD includes Autodesk Architecture, BIM 360, and Autodesk 3D Builder. It also includes the BIM 360 Viewer for display of BIM 360 models on mobile devices. Former products In addition to the products mentioned, Autodesk also sells several other products: Autodesk 3D Studio Max (early 2008) Autodesk 3D Warehouse (2012) Autodesk Flame (2011) Autodesk Navisworks (2005) Autodesk Revit Architecture (2010) Autodesk Revit BIM 360 Project (2018) Autodesk Revit Building Information Modeling (BIM) 360 Project (2018) Autodesk SketchBook (2009) Autodesk Alias (1995) Autodesk Bridge (2010) Autodesk Dynamo (2001) Autodesk Inventor (2012) Autodesk Landmark (1995) Autodesk MagicDraw (2003) Autodesk NavisWorks Navisworks Autodesk NavisWorks NavisXML Autodesk NavisWorks NavisDirect Autodesk NavisWorks NavisModeler Autodesk NavisWorks NavisDraft Autodesk Navis ca3bfb1094

Navigate to the map you want to change in the Programs -> Map Editor -> Open All dialog, find the map you want to change (in my case I chose a Region Map), then choose it from the drop-down list. Click on the "Change Map" button (as you can see, the buttons look very similar). Browse to the Autocad.exe file located in the same folder as where you installed Autocad. If you don't have it, install it first and then go to the folder where it was installed to the Autocad.exe file. Once Autocad.exe is in your list, you will get the "Open Map Editor" dialog shown on this image: When you do so, you will see this: You will be prompted to enter your account information. Enter it and you are done. [Incidence of cardiovascular events during one year of follow-up after revascularization in patients with type 2 diabetes mellitus: in a large population cohort of patients with stable coronary disease]. In patients with type 2 diabetes, the evaluation of cardiovascular (CV) events over time after revascularization is important. We sought to assess the incidence of major CV events in patients with type 2 diabetes who underwent revascularization. We studied 912 patients with stable coronary disease from the prospective cohort GABI-4CHF (Global Action to Control CV risk in Diabetes) which was conducted in France, Greece, Italy, Poland, Russia, Spain and Turkey. During 1 year of follow-up after revascularization, 15% of patients experienced a major CV event, which was comparable to that observed in the overall population, excluding those who died during the follow-up (20 vs. 15%, respectively; P = 0.2). Among patients who survived the follow-up, those with type 2 diabetes were older (66.6 ± 9.8 vs. 63.1 ± 8.7 years, P = 0.01), had a higher body mass index (BMI) (31.9 ± 4.7 vs. 29.5 ± 4.9 kg/m(2), P = 0.0001), were less likely to be treated with statins (76.4 vs. 91.5%, P
