PriMus is a powerful price list and project management application developed specifically for Microsoft Excel users who are responsible for creating enterprise-level price lists and other project-related tasks. One of the biggest flaws that most users often experience when using Excel is that, even if you use the same methodology to create your bills of quantities and rate analysis, their results may vary. The uncertainty of results is caused by not having a proper organizing system. The product that we have selected can help you avoid this issue. It is a software application that offers you the opportunity to create and maintain price lists and other project-related bills of quantities and rate analysis, using a wide range of features. This simple-to-use application allows you to easily modify the form of your tables, the look and feel of the sheets and even the measure units displayed. In addition, you can import a wide range of files and export your results to Excel, Word or PDF. All in all, this price list and project management utility allows you to structure and organize your information by creating several sheets. You can subsequently edit them all at once and customize the form of each table, avoiding using multiple sheets just to make the process more complex. Supported DIFFICULTY: To use this software product, you need to have Microsoft Excel 2007, 2010 or 2013.
