"Jerry.Maguire.1996.BrRip.720p.x264.YIFY.mkv" not suitable for audio and video media . I have tried different videos with different containers & ... and not only. I need containers on Windows that use "extension". How can I fix this error? Sincerely, Hrishikesh Answer You need to install M4B on Windows. Since this is the video format that M4A uses, it is not used when encoding on Windows. You will need to use M4V on Windows. If you can't find this extension, use M4B on Mac and it should be done for you. It will have M4P extension where you will find M4A It's not a bug - it's a spec.
